

Unity Glass Wall - Commercial Series

Model No: GWD XXX-XXXX

OVERVIEW

The new Unity Commerical Series Glass Wall panel system is engineered to incorporate the best qualities of magnetic glass markerboards with a modular full wall whiteboard ensemble.

GLASS PANELS

The marker board system comes in a range of standard sizes from 4' x 12' up to 8' x 24' in combinations of 4, 6, and 8 foot long panels. Panels are made of 0.15" thick, tempered glass and are available in gloss white, gloss black, low-iron white, matte gray, red, orange, yellow, green, blue, purple and navy colors. These glass panels are backed with 20 Ga steel to allow for the attachment of rare earth magnets.

TRIM

The anodized aluminum trim on top and bottom of the board extends the full length of the board with insertable molded plastic caps at either end. Trim protrudes 0.67" from the wall and has a 0.33" deep slot to receive panels with 0.57" of visible trim face. Trim comes as a single piece extrusion up to 12 ft or in two pieces for longer walls that are spliced together using two 14 gauge stainless steel joiner plates and four flat head M6 x 5mm set screws. Joiner plates are inserted through two channels built into trim extrusions. Bottom trim has pre-drilled 1/4" holes for panel height adjustment using M6 x 10mm allen drive, nylon tip adjuster screws threaded through joiner plates.

Trim receives 18 Ga stainless steel wall mounting clips that slide over bottom rail. Clips have a 0.8" slot through which a #10 x 1 1/4" phillips truss head screw is inserted. Screws are driven directly into studs or use drywall or masonry anchors provided. A total of 8 clips plus hardware are supplied for every 8 ft of trim.

OPTIONS / ACCESSORIES

Blade tray available with other glass wall options.

COMPLIANCE

Glass is Indoor Advantage Gold certified.
