

Clarity Acrylic Divider Clamp Mounts

OVERVIEW:

Offering even more options to keep you safe, the Clarity clamp mounts are configurable to multiple surfaces and layouts to easily protect your work space.

MOUNTS

Mounts are two piece aluminum castings, powder coated in platinum. Each piece receives a clear thermoplastic rubber protective insert to cushion contact area with acrylic panel. Mount pieces are connected with a single M6 x 16mm allen screw which can be loosened or tightened to adjust for panel thickness.

EDGE CLAMPS & STANDS

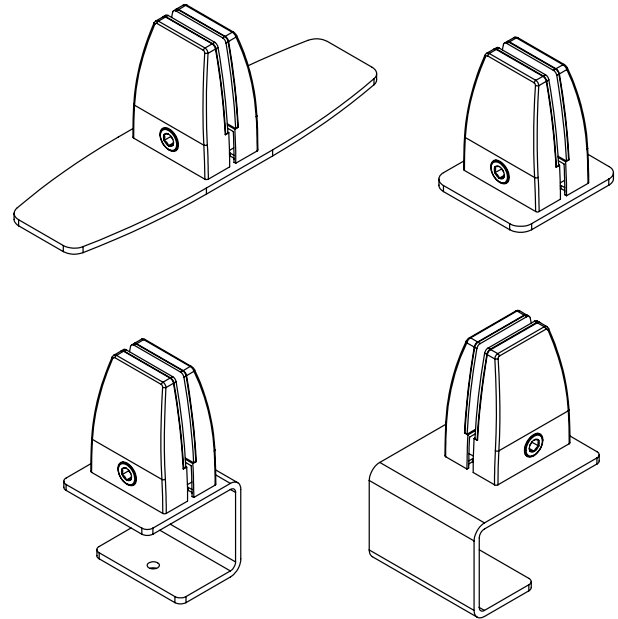

For Edge Mount and Center Edge Mounts only, mounts are screwed into a 3mm thick steel U-bracket. U-bracket has threaded hole through which M6 x 20mm screw may be inserted. This screw threads into a plastic cap and can be tightened into work surface edge to secure mount in place. For panels thicker than 7mm, 20mm screw may be swapped with 16mm in mount to accommodate larger panel. Free Standing Mounts are screwed into 3mm thick steel stands with the outside mounts using the longer stands to brace panel.

PADS

All mounts receive a rubber pad for contacting work surface. Free Standing Outside Mounts include a double adhesive option as well.

PANELS

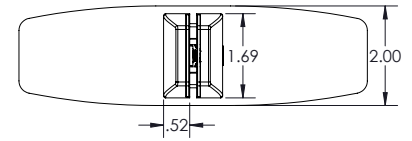

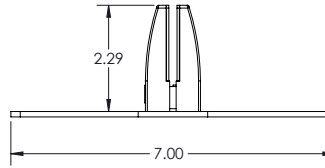

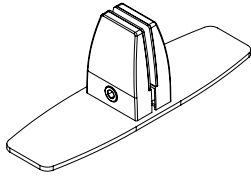

4mm thick acrylic panels are 24" high and of varying lengths. Panels have 1" radius corners and smooth edges. Panels that are 23" and 29" in length receive two mounts and 60" and 72" long panels receive three. The different mount type combinations for each model number are included on the chart on Page 2.

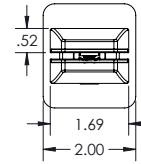

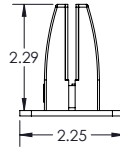

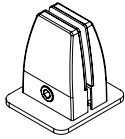

COMPLIANCE:

Indoor Advantage Gold certified.
