

MOORECO™

Not all whiteboards are created equal:

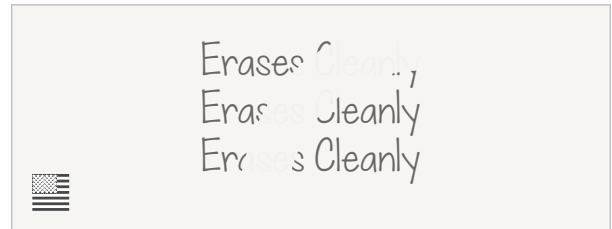

The Surface is the Difference!

Porcelain Steel: Heavy Use

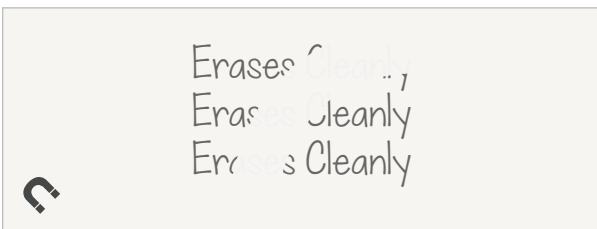

- Ideal for executive offices, conference & meeting room.
- 50 year guarantee: will not dent, scratch, stain, or ghost.
- Magnetic surface engineered for superior color contrast and reduced light distortion to relieve eye strain.
- Made in the USA. TAA compliant. Has achieved GREENGUARD Gold Certification. Class A fire rated surface.
- Designer frames available in assorted sized and finishes.

Dura-Rite®: Frequent Use

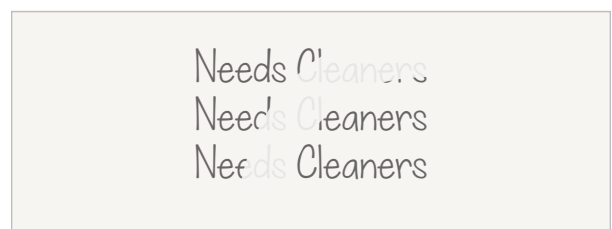

- Ideal for personal workspaces and offices, meeting rooms, and common areas.
- 20 year guarantee.
- HPL surface provides smooth writability and easy erasability.
- Made in the USA. TAA compliant.
- Designer frames available in assorted sized and finishes for any environment.

Magne-Rite: Moderate Use

- Ideal for training rooms, personal workspaces and offices, and common areas.
- 10 year guarantee.
- Magnetic double powder-coated steel is smooth with exceptionally clean erasability.
- Designer frames available in assorted sized and finishes for any environment.

TuF-Rite™: Light Use

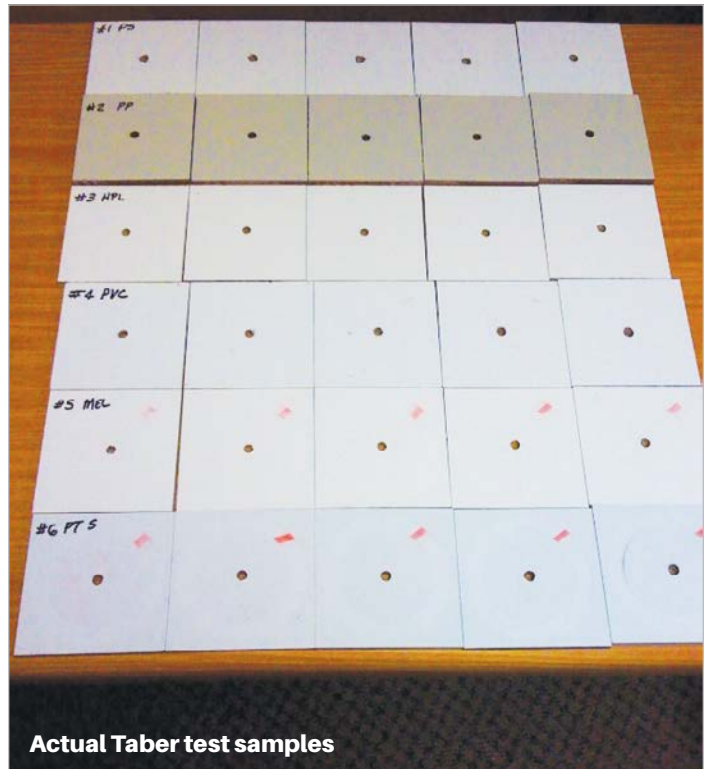

- Ideal for breakrooms, factory floors, or low traffic areas.
- 5 year guarantee.
- Durable thermal-fused technology provides longer lasting performance than standard melamine boards.
- Use of a cleaner recommended for best performance.
- Available in aluminum or wood trims.

MooreCo Whiteboard Surface Testing

MooreCo tests all dry erase surfaces to be sure that the board you purchase has the appropriate surface for the job at hand. Whether light use for home, or for daily industrial use, we have the surface you need.

The Taber test is the same process used to test flooring materials for wear, to show an accelerated facsimile of real life usage. An abrasive wheel is applied to the markerboard surface and after a certain number of cycles, the condition of the surface is reviewed.

After abrasion, the surface is written on with Best Rite® Rite-On® marker, left to dry, then erased using our magnetic eraser cloth. If the marker doesn't erase cleanly, that is a failure.
