

# Acrylic Care & Cleaning

**PLEASE CLEAN ACRYLIC AND CLEAR PLASTIC SURFACES WITH CAUTION.**

*Acrylic is not scratch-resistant and proper care should be taken to avoid damage to the surface.*

1. DO NOT USE window cleaner, products with ammonia, or other harsh chemicals to clean your clear plastic or acrylic surface.
2. DO NOT USE any abrasive or scouring powder to clean acrylic or clear plastic.
3. USE ONLY VERY SOFT AND DAMP CLOTHS when cleaning your acrylic or clear plastic surface.
4. DO NOT USE SOLVENTS to clean or remove any sticky or gummy materials from acrylic or clear plastic surfaces.
5. We advise to not use the same cloths you use to clean your other materials to also clean your acrylic. Using a new or separate cloth will help prevent scratches from dirt or debris picked up by other cloths.
6. Use a special acrylic cleaner or distilled water and a soft microfiber cloth to gently clean smudges and fingerprints from your acrylic and clear plastic surfaces.
