

Schoolworks Storage Bookcase

OVERVIEW

A new versatile and modern storage solution for classrooms, labs, and libraries.

BODY

Side panels are 1" thick laminate construction with particleboard core. Bookcases come in multiple heights and are either double sided or single-sided. Bookcases are available with either casters or legs.

PERFORATED METAL PANELS

Perforated metal panels are 16 Ga steel. Metal panels and legs both come standard in platinum but are also available in metallic charcoal and black. Metal panels are attached to the main body using 5/16-18 x 20 metal inserts. Perforation is 9/32" diameter holes spaced 1" apart center-to-center.

SHELVES

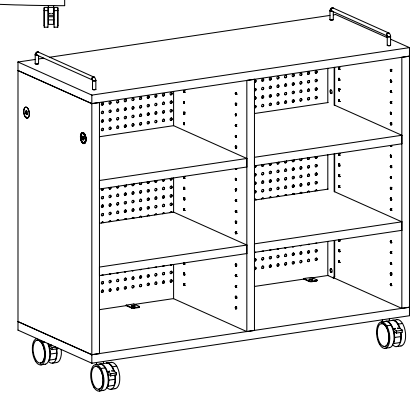

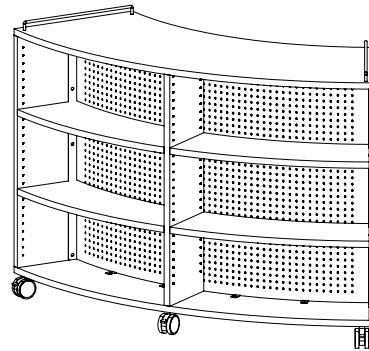

Shelves are 1" laminate construction with particleboard core. Shelves have routed pin slots to prevent sliding and are notched in the back to accommodate the metal panel. Shelves are height adjustable with holes placed in 1" increments along the entire interior of the bookcase.

CASTERS

Casters are 3" diameter and 3-1/2" overall height. Casters are rated for a dynamic load of 165 lbs each and are ROHS compliant. Casters are non-marking with a flat wheel face. They are attached using a top plate mount using four screws spaced 1.625" center-to-center.

LAMINATE AND EDGE BAND

See attached material guide for all options.

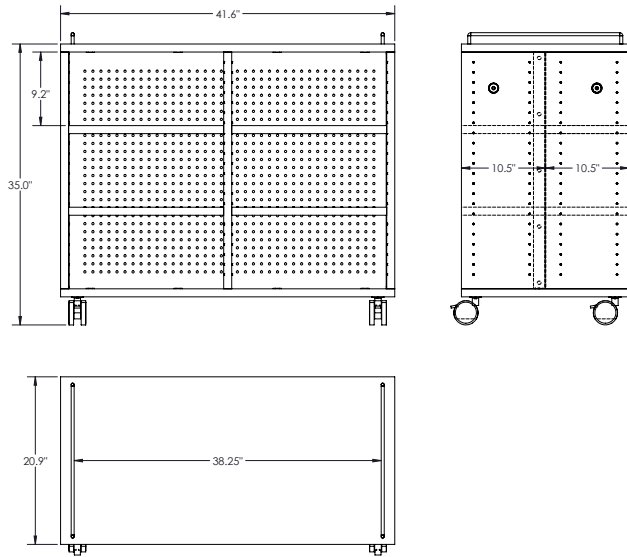

OPTIONS / ACCESSORIES

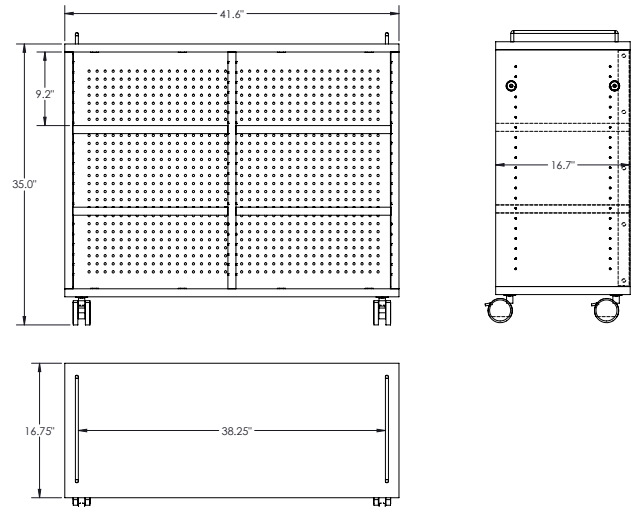

Magnets and strikers are available. They are placed 12-1/2" apart, center-to-center on both sides for ganging. Magnets are MCH-32 neodymium cup magnets and each has a holding power of 88lbs with a direct touch and direct pull. Magnets are 32mm in diameter and are mounted with a #10 screw. The magnet and striker both lie flush with the side panels. Strikers are rust proof low carbon steel, coated with nickel.

Wire pulls are available for attachment on the top of the units. Pulls are 13" long, 3/8" diameter, 1-13/32" projection, 12-19/32" on center. Wire pulls meet ADA guidelines and are attached with 1" mounting screws.
